**South Palm Springs a Step Closer to Newly Updated
and Expanded Fire Station Thanks to Measure J Tax Dollars**

April 10, 2018

Palm Springs Measure J tax dollars are once again serving the needs of the community.

On Wednesday, April 4, the City Council unanimously approved the construction contract for the renovation and expansion of Fire Station No. 4 on Laverne Way in South Palm Springs. The project will begin in six to eight weeks and is expected to take about a year to complete.

The station, built in 1971, has long been in need of updating to meet modern fire service demands in order to better serve the Palm Springs community.

“The new life-saving technology that will be incorporated into Fire Station No. 4 will allow our firefighters to respond to calls and return to service for the next call more efficiently,” said Palm Springs Fire Chief Kevin Nalder. “This is excellent news for our community.”
